

## **GLASS BLOCKS FINISHING - READ CAREFULLY**

Keep in mind that you have fresh painted glass blocks.

1. Before installing glass blocks, cover painted side of block with piece of paper or something else.  
Try to keep it clean during the whole process of installation! Any glue or concret can damage painted surface.
2. Fill the spaces between blocks with finger or soft rubber. Try to not touch the painted side!
3. You can use window cleaner and soft wiper to clean the surface.
